

# Steps To Run The Project

## Step 1:

Replace the connection string from AppSettings.JSON.

```
1 {
2   "Logging": {
3     "LogLevel": {
4       "Default": "Information",
5       "Microsoft.AspNetCore": "Warning"
6     }
7   },
8   "AllowedHosts": "*",
9   "ConnectionStrings": {
10    "MoviesApp": "server=ALIPLR8193\\SQLEXPRESS;database=MoviesApp;Trusted_Connection=
11  }
12 }
13 }
```

## Step 2:

Open the Package manager console and type “Add-Migration”, it will ask name type “Initial”.

```
Package Manager Console
Package source: All
Default project: M
Package Manager Console Host Version 6.1.0.106
Type 'get-help NuGet' to see all available NuGet commands.
PM> Add-Migration
cmdlet Add-Migration at command pipeline position 1
Supply values for the following parameters:
Name: Initial|
100 %
```

## Step 3:

In the Package manager console and type “Update-Database”.

## Step 4:

Run the Project.

**Note:** Payload for all the endpoints is automatically shown in the Swagger upon launching, For **PUT** endpoints mention **ID** along with the shown payload.
